Trouble Feared in Mexico City Next Sunday-Banks Will Be Guarded

Mexico City, Sept. 10.—Antonio Serna and three of his lieutenants who had aided him in forming a plan to open the capital to the Zapatistas on the night of September 15, were executed by a squad of soldiers. Serna confessed that he and his followers expected to engage in looting on the national holiday next Sunday. He also confessed to having raided and robbed villages in. gage in looting on the national holiday the federal districts.

That trouble is still feared on the night of the 15th is indicated by the fact that the bankers of the capital have agreed to name one-third of their employees to ect as guards on that right, arming the men with rifles from the government arsenals. It is also learned that the big jewelry houses are placing all of the valuable jewelry in stock in the banks for safekeeping.

Government officials continue to regard as absurd the reports that the United States government is seriously considering intervention in Mexico. It was declared at the national palace today that conditions are steadily growing better. ### TELLS OF FINDING OF LOST TRIBE

PROF. STEFANSON RETURNS FROM NORTH

Newly Found People Are of Norwegian Origin-Explorer Suffers Hardships

Seattle, Wash., Sept. 10.—Ranking next in importance from an ethnologi-cal standpoint to the discovery of the lost tribes of Israel, is the discovery made by Prof. Vilhjalmar Stefanssen, of the American Museum of Natural History, of a lost tribe of white people who are believed to be direct descendants from the followers of Erickson, who came from Greenland and Yoland about the year 1,000 and a few years later discovered the north coast of America. These people are living on Victoria Island, 30 degrees east of the mouth of the Mackenzie river, and more than 2,000 miles by the coast line, and are still in the Stone Age. While the civilization of nearly 1,000 years has passed they have stood still.

Prof. Stefanssen arrived in Seattle

has passed they have stood still.

Prof. Stefanssen arrived in Seattle yesterday. One of the remarkable incidents of the five-years' exploration which Stefanssen carried on is the fact that he left his winter headquarters near Bank's Land four years ago with sufficient flour and other cereals to sustain himself and his associates for two weeks and enough sait and tea to last for four weeks, and with this scant supply of food lived for four years on the bleak, inhospitable shores this scant supply of food lived for four years on the bleak, inhospitable shores of the Polar sea. Seal and bear fur-nished him food and clothes. In 1910 Stefanssen returned to the mouth of the Mackenzle river, where he was joined by Dr. R. M. Anderson, a for-

mer college classmate.

During his peregrinations about the region at the top of the world Stefanssen discovered thirteen new tribes of people. Ten of these tribes had never seen nor heard of white men. The progenitors of two other tribes had seen the members of the Frankin expedition and one tribe had once been visions and one tribe had once been vis-

genitors of two other tribes had seen the members of the Franklin expedi-tion, and one tribe had once been vis-ited by a whaling vessel. The tribe of white people, which Stefanssen declares are purely of Nor-wegian origin, never had seen persons other than their own color. Their other than their own color. Their number is about 2,000, and more than half of them have rusty red hair, blue

number is about 2,000, and more than half of them have rusty red hair, bue eyes, fair skins and tow-colored eye-brows and beards. They live on both shores of Coronation Gulf, on the mainland of North America and Victoria Island, which formerly was known as Prince Edward Island.

It was for these people that Raould Amundsen, discoverer of the south pole, searched while making his trip through the northwest. Amundsen, it will be remembered, stated that natives had told him of a race of white people living to the northward, but he was unable to find them. Amundsen sent an expedition along the shore of the island, but saw nothing of the tribe, nor did they see anything of him. Many other Arctic explorers have brought down from the north stories of this tribe of lost white people, but the tale became to be regarded as Indian legend which had no foundation in fact.

Ottawa, Sept. 10.—The Evening Citizen, in discussing the work to be taken up- by the cabinet council now that Premier Borden has returned to Canada, says:

"After the tumult and demonstration incidental to the return of the prime minister terminates, the cabinet council, without delay, will get down to the actual work which awaits its attention. One of the first thing its attention. One of the first thing its attention. One of the first thing will be a survey of the situation to determine what date is preferable for the assemblage of parliament. Then a great budget of legislation for presentation to it must be prepared. Opinions somewhat differ as to whether the house will meet in November or early in January. The question has not yet been considered, but will be at once.

"Of outstanding importance is the

and that none will be until additional information from the British Admiratily is forthcoming. There need be, no surprise if an announcement is not made until parliament assembles. The question of what, if anything. The question of what, if anything is to be done with, the tariff, the redistribution bill, revision of the Bank Act, questions of general policy, the Canadian Pacific stock increase and a lot of legislation not yet definitely determined will, in addition to the ministry. All these things, in the opinion of many, operate against the opening of an early session.

"Seven vacancies in the senate are to be filled, and the by-elections at Macdonald and Richelleu to be arranged for. Possibly an extra civil service commissioner determined. Everything, consequently. points to the cabinet having an extremely busy fall. Hong, G. E. Foster returns to London on the tober 1 to attend the imperial trade commission."

With the exception of Hon, Sam Hughes and Hon, J. A. Lougheed, all the cabinet ministers are now in the city.

# LADY DOUGHTY AND

### TALENTED WRITER IS DECIDED OPTIMIST

Helps Sir George in His Constituency by Organizing Woman's Unionist Club

Lady Doughty, who has just arrived in the city with her husband, Sir-leorge Doughty, is optimism personi-ied, and has the happy genius of beng able to pierce with her philosophy hrough the visions of the sordid and lepressing which hover over mankind, and glimpse the shimmer of the orighter and happier things which, she

says, invariably lie beyond.

She has put some of her ideas
the subject of the universal prese of hope into concrete expression in "The Cheerful Way," (A. & E. Black), some of the expressively optimistic titles of the chapters being, Opportunity, Progress, Faith, Spring in London, Gardens, and subjects of a like nature Gardens, and subjects of a like nature whose yery name conveys breath of happiness. Incorporated in this strongly buoyant book is a special chapter on the Canadian woman—a type of woman for whom the author is filled with a great admiration, and whose resourcefulness, adaptiveness, and practical good sense she commends in the highest terms.

The blook; appearing as it did in the form of a criticism of the English by an Australian, caused considerable comment at the time of its appearance some of which was of a somewhat adverse nature. A humorous attack was made on the somewhat morbid view which the average Britisher is ccustomed to take of things in gen the unnecessarily melancholy tone of the newer books which are being brought out both in England and America. Taking themselves seriously
—as Englishmen are somewhat wont
to do—a small storm of protest arose
from the reviewers on behalf of their nglish brothers whose position wa

Is An Australian

Lady Doughty is an Australian by birth and up-bringing, and has all the native vivacity and love of light and sunshine that belong to that sunny land of flowers. Australians, she says, are almost like the people of the South of France in their love of pleasure, and make this their pursuit just as we in Canada, she considers, make money ours. The people have a naey ours. The people have a na-galety of heart, and an almost where poverty is never seen. however, does not mean that it ins a nation of iclers, for perhaps noth-ing is greater proof of the existence of workers than the fact that the Labor party is now in power, and that, under Sir George Reid, changes have been already affected in the Commonwealth tending to the increase of wages, with, however, a consequent advance in the prices of food and other products.

In this connection it is somewhat nteresting to hear from Lady Doughty that it was largely due to the fact that women in Australia have the franchise that the Labor party was successful, as the ballot was only exercised for e first few years by the working we men who were interested in benefit-ting their position as wage-earners. It is six years since Lady Doughty left Australis, during which time she has followed the growth of the movement with some interest, and has seen dur-ing the past year a greater tendency for the exercise of the franchise by end be responsible for other political changes. ### BORDEN'S OBSERVATIONS.

The banquet tendered Rt. Hon. R. L. Borden at Ottawa last night seems to have been celebrated in character befitting the occasion, and it is gratifying to find the press agents declaring it the greatest welcome ever tendered in Canada to a minister returning from the Mother Country. Canada is becoming a big country and the matter upon which Mr. Borden went to London was a big matter. It was fitting, therefore, that he should have a big reception on his return. There were two observations made by the premier in his reply to the address last night which show that Mr. Borden, if not yet a big man, fore he went to England. The first of these was striking enough to be regardsaid: "Those who think the great mother of nations is dead or dying are mistaken. The people of Britain are of the same sturdy stock that has built and as firm to defend their ideals as their forefathers were of old, and that ment will bear analysis, and there is and still make Great Britain great has leaven will leaven the whole lump of ers, and it is to this task that Canadian Torvism.

### TWENTY-FIVE YEARS AGO TO-DAY

Victoria Times, September 10, 1381.

The first direct trip from Port Angeles to Victoria for over twenty years occurred yesterday when an excursion party of 51 went from Victoria and returned. Port Angeles possesses a beautiful harbor, a long wharf, three hotels, two stores, bakery, printing office, saw mill, telegraph, post office and signal station. In addition there are the extensive offices of the Co-operative Colony, comprising 3,000 members. About 350 of them have arrived, but as the saw mill has been unable to cut, the lumber supply has been limited, and 250 of the settlers have to live in tents.

to live in tents.

Mr. W. J. McKay, a compositor in the Times office, while hunting this morning accidentally shot himself in the toe. After the accident he walked, with the blood streaming from his toe, to the city. Tomorrow the doctor will know if amputation of the toe is necessary.

Capt. John Irving leaves to-night for San Francisco and will return with the new steamer Premier.

The sealing schooner Lottie Fairfield arrived this morning from the Behring sea with 2,500 skins. The Adela arrived in the harbor this morning with 1,550 skins.

A new colonization company is looming up to acquire land in the northwest, and is to locate settlers, advancing them on the security of buildings to be erected for their use, \$600 apiece.

Mr. William Paterson, in an admirable address at the Victoria theatre last Wednesday, laid bare startling facts relating to the enormity of the sugar monopoly fraud.

### LIGHTING SCHEME.

C. P. R. Will Participate If Government and Others Consent.

With regard to the proposed lighting recently inaugurated by the ouncil and the Board of Trade, a letter rom Captain Troup, of the C. P. R., pany to participate in the scheme under certain conditions. These are embodied in the following extract from

"That if the provincial government "That if the provincial governments and owners of property on Wharf street are agreeable to the proposed electrical installation and taxation incident thereto, our company will offer no objection and will consent to bear their share of the necessary taxation."

Vancouver Island Development League Kept Busy.

A perfect shoal of correspondence from all parts of the world descended upon the Vancouver Island Develop-ment League office this morning, and the secretary and his assistant are hard put to keep the numerous appli-cants supplied with the data they re-quire. The great majority of the com-nunications received to-day came in the British mail and represented al-most every country in the British No less than thirteen applications

from Ireland were received, all of them inquiring as to the nature of the employment possible and the chances of investing capital in this country. In addition to the home country cor-respondence, a letter was also received from the British Club, in Alexandria, Egypt. This was from a retired army officer anxious to set up fruit farming

Probably the most interesting of all Probably the most interesting of all was a communication from a father of two sons in Pontypridd, who after lamenting the present condition of affairs in the Old Country, goes on to inquire if it would be possible for his sons to continue their present employment as coal miners somewhere in the land of the present was a Nanajmo, He has ment as coal interest as at Nanaimo. He has heard from outside sources that it is frequently the custom in this country to employ foreigners in that capacity, and he wishes to be clear on the point before emigrating with his family in the fall.

Preparing For Fall Work.-The var lous directors of departments of the local branch of the Young Men's Christian Association are working hard preparing the programme of work for the fall season. Each man work for the fall season. Each man is required to have his recommendations in by Saturday next so that the schedule of work may be complete at the earliest possible time. The board of directors of the association will meet this evening at 8 o'clock and it is very probable that the subject of the winter programme will come before them.

### PEMBERTON ROAD.

Paving of This Thoroughfare Await Engineer's Inspection

It was thought the paving of Pe berton road was at length settled, but Alderman Gleason showed the city council last evening that the author-ities were not yet out of the wood A motion had been presented that the council should lay three inches of asphalt on the present surface, and the phalt on the present surface, and the owners should pay part of the cost. Alderman Gleason showed that the surface drain had been turned into a sewer, and before anything was done the engineer should look into the question. The concensus of opinion was that if extra expense was involved in supplying these necessities the own-ers should also pay part of the cost

### OAK BAY POLICE.

The "Finest" Will Be Garbed in Uni-forms—Jail to Be Repaired.

The Oak Bay council last night received a report from the newly-ap-pointed chief of police, William Hand-ley and instructed the municipal officials to proceed with repairs to the municipal jail and to call for tenders for uniforms for the police force. The ch'rf's report asked that the jail be repaired at once as it might be needed during the races. Detectives from the city and constables also will be employed at the expense of the racing associations during the race meet ociations, during the race meet.

The horse racing by law was amend-ed last night to allow two Saturdays' racing at the one meet and the coun-cil in committee took under consideration a request for a prize fight per-mit received from V. K. Grey and W

### PIONEER PLACE.

No Settlement Reached So Far With Regard to Key Plan of Old Cemetery.

No report has yet been presented

No report has yet been presented to the city council with reference to the key plan of Pioneer Place, or as it is better known, Quadra street cemetery. When Mr. Fawcett applied for this plan, which is the key to the plan in the engineers' office, and shows the actual graves in this historic spot, the actual graves in this historic spot, the situation was explained to the council. The headstones now are all at the east end, save those of special value from association either with naval affairs, or pioneers of the community, which were left undisturbed; but ap-parently it is not an easy matter to settle the question amicably. Mr. England has a grievance, and by the retention of this key plan he can place the authorities in difficulty, so that until that dispute is settled, it is not likely that any arrangement will be reached. The importance of this document to the city is important, as without it their existing information is valueless. As the late Agnes Deans Cameron has given the spot a fame beyond the radius of this province, the situation deserves a settlement immediately.

LABORERS' COMPLAINTS.

Two Letters for Investigation From Local Unions Protesting Against Company and Foreman.

Company and Foreman.

Two complaints came before the city council last evening with reference to questions of labor. The Victoria Laborers' Protective Union stated that the Canadian Mineral Rubber Company was hirths men at less than \$3 a day, and was subletting contracts to Italians. The paving company should be brought to task, says the letter, the secretary of the union challenging the officials to make the fullest investigation. The writer, G. J. Cook, who resides in Esquimait, pointed out that he hoped the city would not enforce the rule as to men employed by the city living within the limits, as suggested by the civic employment bureau resolution adopted last week, as the high rates within the city forced men to live outside. The city engineer will investigate the charges about the Canadian Mineral Rubber Company.

The other communication was from the Cement Workers' Union, and alleged incompetence against City Foreman Nixon on sidewalk work on Eu-

### PITTS' BOAT FOUND AT CAPE FLATTERY

No further news has been received accally in regard to the accident which befell Arthur C. Pitts of Sunday in Puget Sound, where he was stranded in his launch Gladys, but the fact has become known by a wire from Tacoma that the tug Fearless when it took the occupant of the launch from his boat, left the boat adrift. The Gladys was found off Cape Flattery vesterday by feft the boat adrift. The Gladys was a found off Cape Flattery yesterday by a fishing boat, the Oregonian, which indicated that had Mr. Pitis not been rescued by the Fearless on Sunday he would have been brought by the tides and currents westward again, and carried out to the Pacific ocean before being rescued.

The Tacoma despatch reads: Tacoma, Sept. 10.—While fishing off Cape Flattery yesterday the seine boat Oregonian of this port picked up the gasoline launch Gladys, of Victoria. There was no one on board the craft at the time, and it is feared her captain has been lost.

Committee.

A public meeting under the auspices of the Victoria Citizens' committee at the board of trade rooms on Thursday afternoon at 4 o'clock when the following business will be transacted:

1. To consider the advisability of making the Victoria Citizens' committee a permanent institution, for the express purpose of having a standing reception committee in the city, ever ready to entertain prominent visitors from other parts of Canada, from the United States, from the other far outposts of the British Empire, and more especially, distinguished men from the British Isles.

2. To discuss W. L. Hatflaway's proposition, as outlined in his speech at the Empress hotel on the 28th of er August, for a "Henley Regatta Week" or "Water Carnival" to be held annually in Victoria as an attraction, to ethe people of all the Pacific Coast cities, and other points, to come to Victoria for that occasion every year.

3. Any question for the betterment of conditions in Victoria that may come within the scope of future work of the Victoria Citizens' committee.

Foul Bay Road.

There was some discussion over the proposal to widen Foul Bay road to a uniform width of 50 feet in view of the fact that the widening is on the west side exclusively, and the cost would fall entirely on the Victoria side of the boundary, the Oak Bay owners not contributing a cent to the cost of expropriations, through the east side not being affected.

Several of the aldermen said the residents would not stand for this one sided proposal, Alderman Siewari remarking that Reeve Oliver would not agree to contribute anything. It was determined to put the matter up to the Oak Bay municipality to see whether they will meet a part of the cost.

PUBLIC MEETING. building inspection should lie to the board of supervisors consisting of the "chairman of the fire wardens, the en-gineer and the fire marshal." He pro-poses that appeals taken from the building inspector's decision should be heard promptly, and a decision known.

# JUBILEE ANNEX

Victoria's Last Close-In Home Subdivision, on Richmond Avenue and Haultain Street, Only One Block Beyond Fort Street and Willows Car Line, Now Almost Sold Out

The sale of this property has been unusually brisk right from the beginning, and those who have not yet seen it should make arrangements right away. A few more days of rapid selling will see the last lot taken, and then this property, like all other property in the neighborhood, will cost a good deal more money than we are asking for it. Remember, this is the last close-in subdivision in Victoria.

BETTER TAKE ADVANTAGE OF OUR EASY PRICES AND TERMS THAN PAY A HIGHER PRICE AND MEET HARDER TERMS LATER ON

Ten chances to one, you will buy a lot either in what is now "Jubilee Annex" or in a similar district eventually. Why not buy it now when it will cost you less than ever again? Not only will it cost you less to buy now, but it will give you a far larger margin of pr fit if you care to sell a few months or a few years hence. Think it over!

# "JUBILEE ANNEX" IS A MODEL ORCHARD

Some of the finest examples of fruit trees in Victoria are to be found on this property—cherries, apples and pears abundantly productive and now heavy with the autumnal crop. Almost every lot in the subdivision contains some of these fine trees, an important consideration in itself. The property is surrounded by charming homes; in fact the entire neighborhood is well established as a desirable home district. Both Richmond avenue and Haultain street are important thoroughfares. The Mount Tolmie street car line runs along Richmond avenue, and on this avenue the new Normal School and the new University School will be built. Those who buy in "Jubilee Annex" will have the benefit of two car lines, the Mount the excellent Willows service, on Fort street, a block away. They will also have city water, electric light, sewerage and all the comforts and facilities of modern municipal life. The lots are clean as a whistle and cleared of all, save fruit trees and shade trees. The sizes vary from 50x118 to 50x180. Second avenue, a fullwidth, 66-ft. street, divides the property in the centre.

UNNECESSARY NOISES.

To the Editor—I know of one locality within the city-limits, and I am sure there are many others, where foroclous hammering and clashing together of boards goes on between 5 and 8 a.m. In the particular place to which I refer there is a sickly child and consequently a very weary mother, who informed me they are disturbed by this selfish and unreasonable noise, and cannot rest.

Why should people be disturbed in this ruthless way by a few grasping persons who wish to supplement the daily eight hours in such a way, to save a few cents?

I see no remedy but publicity in the local papers. Surely this is far more distressing than the crowing of a rooster, for which a man got into trouble not long since.

SPENDS SAVINGS OF LIFETIME.

Kansas City, Mo., Sept. 10.—Eleven hundred dollars, the savings of a dozen years, was spent Sunday night by Guiseppe Annelo, a laborer in the employ of the Kansas City street department, when his daughter Mary, 16 years old, became the bride of Vito Campanello, 19.

Fifty-nine motor cars, hired by Annelo, whirled the wedding guests on a long tour over the city's boulevards, and the feativities ended in an elaborate banquet and ball at a hall in "Little Italy."

Annelo said he had been saving for the event ever since Mary was a little girl in Sicily.

### CADETS FINED

Melbourne, Australia, Sept. 10.-A serious situation has arisen in connec tion with the fining of cadets who have failed to put in the necessary number failed to put in the necessary number of drills required by the compulsory military service scheme. The lads are fined \$25, and if that amount is not forthcoming they must go to jail. Many of the parents of the boys, it is stated, cannot afford to pay the fines. The question has arisen whether the jailing of the boys will not have a deleterious effect on their after life, and politicians are endeavoring to bring before the government some scheme which will do away with the imprisonment part of the penalty.

### UPTURN IN THE

**GRAIN MARKET** 

at Chicago, With the Shorts Covering

(Courtesy F. W. Stevenson & Co.)
Chicago, Sept. 10.—Action in wheat
for the day was little surprising. The
fact that the total wheat yield of the
country was not raised to the figure expected was offset in the minds of the
local trade by the belief that later reports based on threshing returns will
further chlarge the spring wheat total.
Abroad they did not look into this feasure of the crop report and put a bullish construction on the figures cabled
last night. Liverpool, Paris, Berlin and
Antwerp were all strong and higher.
The foreign strength was followed by
a fair upturn of about & in the Chicago
market with shorts covering. One
cause for the strong recovery in the
wheat market in the last half hour was
an unexpected upturn in the Minneapolis prices. Cash wheat in that market was in demand at a and 2½ cents
over September, and flour sales reported Hiberal. Winnipeg and Duluth claimed export demand. On top of 600,000
bushels, lake charters, additional vessel room was taken for 300,000 to-day.
Influences in the trade are conflicting
for the present. Open High Low Close

### There's a "Want Ad Audience" Waiting For Your Message!

Each classification of the want ads has its own special readers-people to whom, on that particular day, the ads under that classification have especial interest.

The people who are looking for work read nothing else the paper with half of the interest and attention that they give to the "Help Wanted" ads.

The people who want to find places in which to live turn eagerly to the "For Rent" classification, and welcome the appearance of an ad that looks to be "worth investigating."

The people who are about ready to stop paying rent read the real estate ads with the purpose of finding the

The employer, whose need of "help" is urgent, turns to the "Situation Wanted" ads in the hope that the worker

With every classification it is the same. There is a changing "audience" every day, but a sure-to-be-interested one. Thus, when CLASSIFIED, your message goes DIRECTLY to all of the people in the city who, on that day, have any interest in that sort of message

# FOR HIS REPORT

RESULT OF MISSION

Committee Appointed to Secure Legislation Along the Lines of Report

The city council last evening tendered a vote of thanks to Mayor Bockwith for an exhaustive and interesting account of his mission in the East, where he represented Victoria at the annual convention of the Canadian Union of Municipalities at Windsor, and wax elected a vice-president of that body.

His worship indicated that there was considerable probability that the con-

oneiderable probablity that the conention might be mauced to come to Victoria in 1915, the year of the Pana-ma Pacific Exhibition.

ma Pacific Exhibition.

Alderman 3leason bened some practical good would come from the attempt to make governments contribute their just share to municipal taxation, and that the Union executive would take the matter to the various governments interested. The city was directly concerned in this matter.

Mayor Beckwith adopted a suggestion that the reports of debates and discussions, when they came, should be laid before the municipal commission now sitting in this province.

A committee, consisting of the May-

done at an expenditure of \$5,090,000 in the best prepared and most interesting addresses heard in the convention was that given by ex-Comptroller F. S. Spence, of Toronto, on "Municipal Government by Commission." The speaker went very fully linto the history and every phase of commission government, beginning with Galveston, Tex., where it originated in the United States, and every phase of commission government, beginning with Galveston, Tex., where it originated in the United States, and every plane of the worked to advantage in Galveston: alignon on the question of city franchises. The speaker was the state of the smaller type, but did not favor the plan for the larger and more important cities. # **WESTHOLME COMPANY**

Wants Full Allowance for Gorge Road Pipe at Once

The city council received a letter evening from the Westholm cumber Company, asking to be paid in view of the large hold-back held by the city in assurance of completion of the Sooke waterworks contract.

Mayor Beckwith said the letter pre ented a rather startling argument view of the fact that the pipe should

have been in by May 1.

The letter, which contained the following clauses, was referred to the finance committee and water commissioner: That the 2,700 lineal feet of pipe has been delivered and the company been allowed, on its estimate, 514,175, according to contract. Of this amount the company has received in cash \$5,505, the balance being retained by the city as percentage on hold-back and guarantee for completion. Owing to the fact that this material is wanted before the balance of the pipe line, the steel plates for the manufacture of the pipe had to be brought overland at a greatly increased cost and, owing also to the fact that the company's own machinery for pipe-making could not be delivered in time for this work, the company was put to the mecessity

former exists the very opposite of democracy. And here let me say in connection with the ward system; During the discussion on this matter, it was found that in no instance in the larger cities in Canada, cities of the size of our own or larger, has the ward system been abolished, except in the city of Toronto, whera some years ago they made the change in connection with their school board. Thinking that they would get a better and more satisfactory board of school trustees it elected from the city at large, they did away with the ward, but it was found that the central portion of the city, soon had control and elected whom they liked, much to the detriment of the outlying districts; the board was meither representative nor satisfactory and some three years ago a plebescite vote was taken as to whether the city should return to the ward system in school elections, and resulted in an overwhelming majority in favor of the ward system. The board how representing the different escitors of the city, it is claimed, is very much more satisfactory. Mr. Spence was supported in his position on this important subject in a very able speech by Mayor Hopeweil. of spence was supported by Alderman Marin, of Montreal, who told of the great improvement in the Montreal city government since the establishment of the board of control a few yearn ago. Only one colored as in the control plan met with practically the dumanimous approval of the large and representative gathering present.

Ignorance of Easterners.

The following are extracts from the report of this worship:

"I found our good fellow citizens of the Eastern provinces were very far astray in their idea of the geography of this coast, having gotten the habit of always referring to another city as the most western point in Canada, it was my privilege to frequently remind them that to the beautiful city of Victoria belongs the honor of holding the keys of the Facific gateway to this great Dominion, and I feel quite sure that many of the big men of the big streat Dominion and provincial with the control belongs the honor of holding the keys of the Facific gateway to this great Dominion, and al feel quite sure that many of the big men of the being cities of the East have now a better idea of the importance of the Capital City of British Columbia than they have hitherto had.
